Study of packet tracer tool installation and user interface overview

Aim:

To Study the Packet tracer tool installation and user interface overview.

Procedure:-

Analyse the behaviours of network device using Cisco Packet Tracer Simulator.

(1.) From the network component box, click and drag-and-drop the below components:

a. Generic PCs and One HUB
b. Generic PCs and One Switch.

(2.) Click on Connections:

a. Click on copper straight through cable.

b. Select one of the PC and connect it to HUB using the cable.

c. Similarly connect 4 PCs to the Switch using copper-straight-through cable.

a. Drag and Drop it on one of PC (source machine) and then drop it on another PC (destination machine) connected to the HUB.

④ Observe the flow PDU from source PC to destination PC by selecting the Real time.

⑤ Repeat step #3 to step #5 for the PCs connected to the switch.

⑥ Observe how HUB and switch are forwarding the PDU and write your observation and conclusion about the behaviour

Result:-

Thus, the study of packet tracer tool installation and user interface overview has been executed successfully.
