Exp

Exp No: 01	Experiment on a capture tool:
27.08.26	wireshark

Aim:-

To experiment on packet capture tool wireshark.

Procedure:-

1) Select Local Area Connection in wireshark
2) Go to capture option
3) Select Stop capture automatically, after 100 packets.
4) Then click start capture.
5) Save the packets.

1) Create a filter to display only the TCP/UDP packets, inspect the packets

→ Select LAN connection
→ Go to capture option
→ Select stop capture automatically
→ To see flow graph; click statistics
→ Save the packets.

(2) Create a filter to display only ARP packets and inspect.

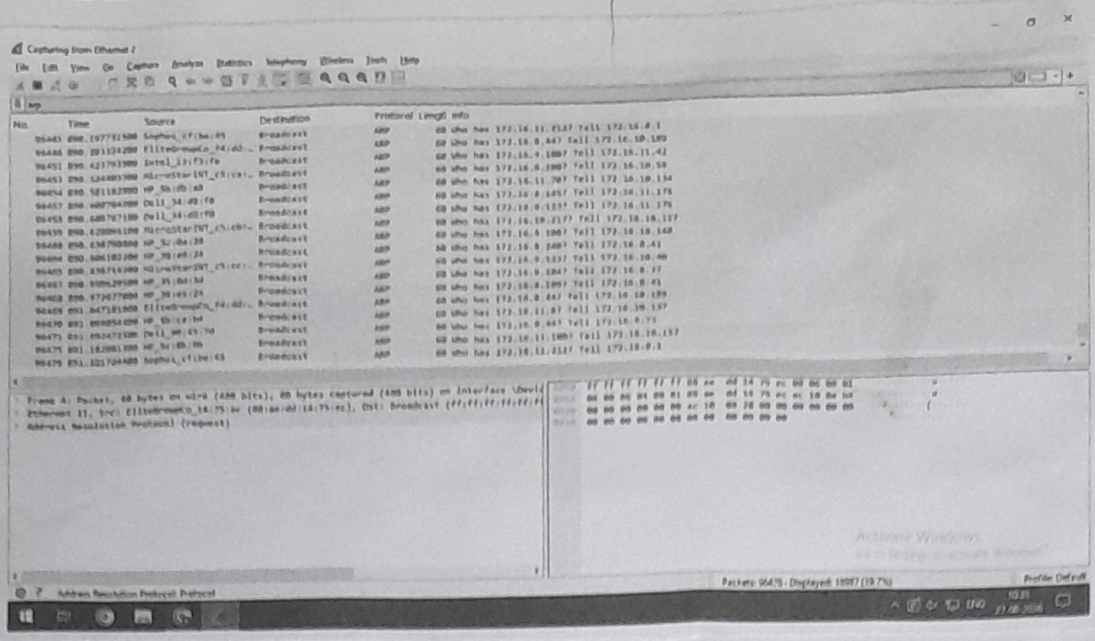

→ Go to capture option.
→ Select stop capture automatically
→ Then click start capture
→ Save the packets.

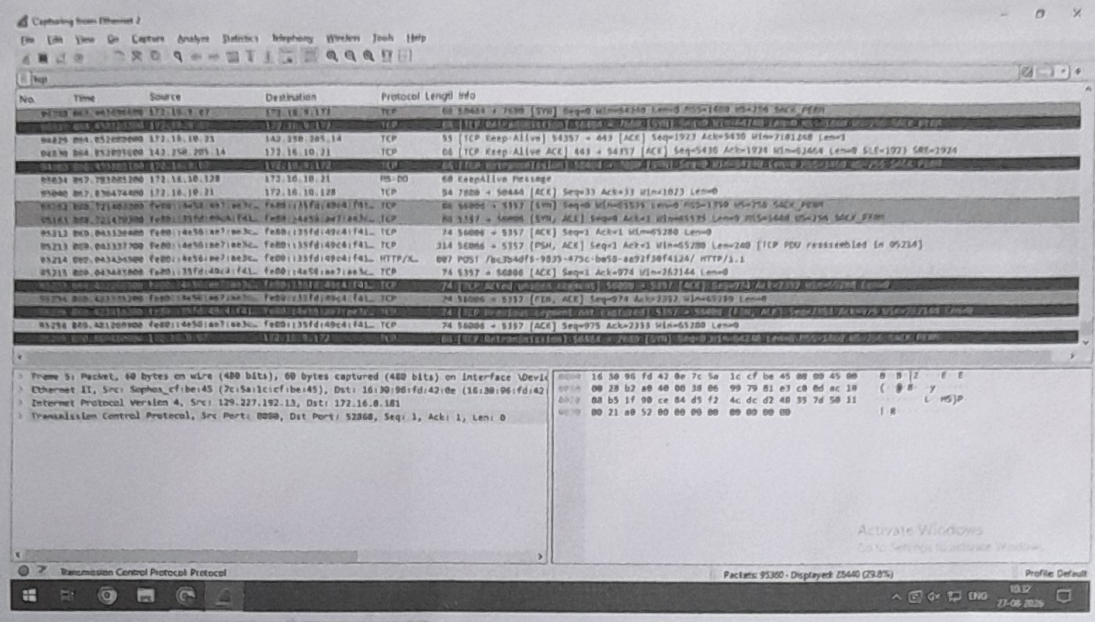

(3.) Create a filter to display only HTTP packets

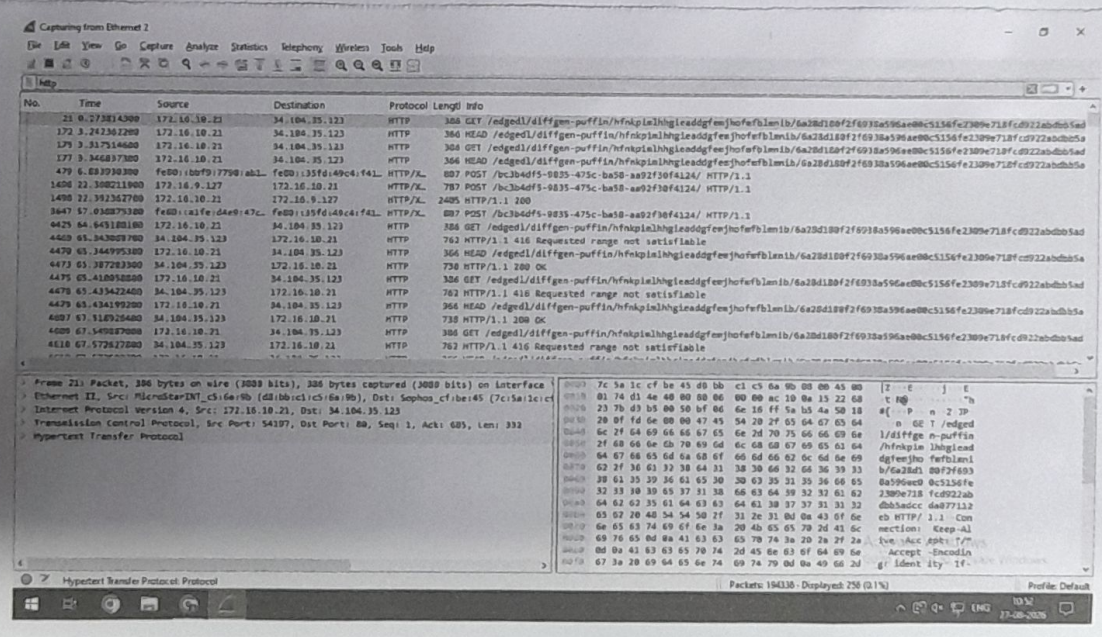

→ Select LAN in wireshark
→ Go to capture option
→ Then click start capture
→ Search HTTP packets in search bar.

(4.) Create a filter to display only ICMP/IP packets.

→ Select LAN in wireshark
→ Go to capture option
→ Select stop capture automatically after 100 packets.
→ Then click start capture
→ Search ICMP/IP packets in search bar.

Result:-

Thus the experiment to access all the packets using wireshark was executed successfully.
