Exp no: 08 Discover Live host using NMAP scans
11.09.24 on Tryhackme

Aim:

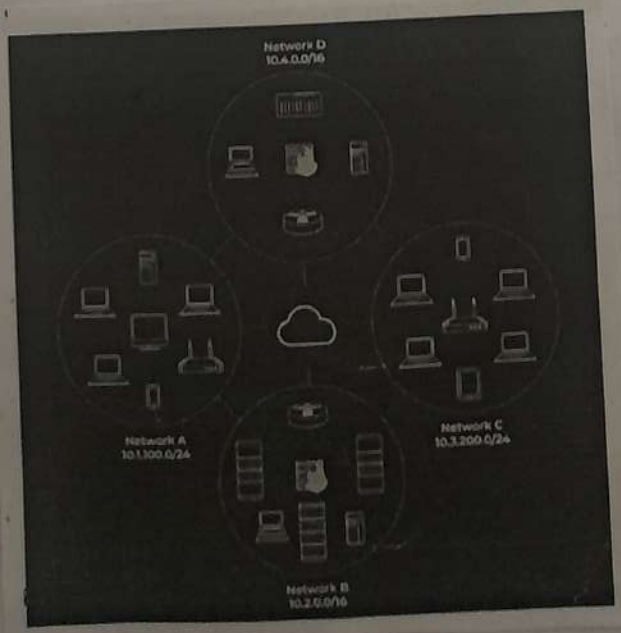

To discover live host using NMAP scans (ARP, ICMP, TCP/UPP) on tryhackme platform.

Introduction:

When targetting a network we need an efficient tool to handle repetitive tasks. This room is first o four in NMAP series:

- NMAP Live host discovery
- NMAP basic port scans
- NMAP Advanced port scans
- NMAP post port scans.

Subnetworks:

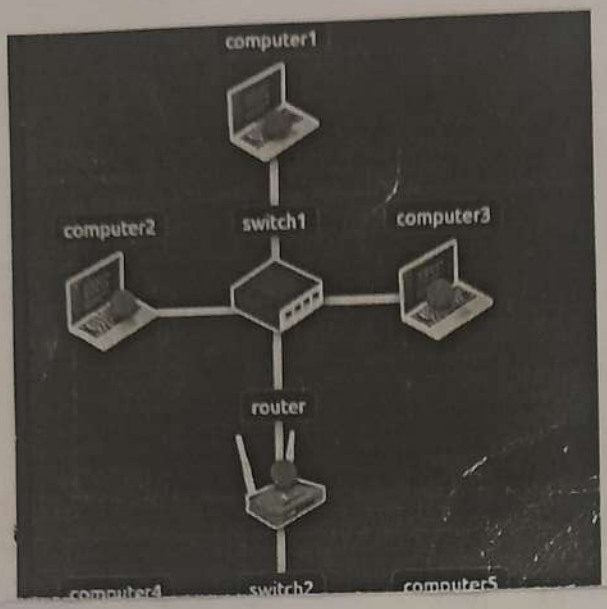

116 subnets

124 subnets

NMAP Host discovery using ARP:

When a privileged user tries to scan targets on local network, NMAP uses ARP request.

UDP PING:

While receiving UDP packets to open UDP ports may not trigger a response, sending them to closed UDP ports.

Results:-

Thus the requirement has been completed successfully. Using Try hackme.
