Exp NO: 13 Implement own ping program

8.10.26

Aim:

To implement your own ping progam

Code:

```
import os
import platform
import subprocess
def ping(host: "google.com", counts=4)
    param = "-n" if platform.system().
                lower() == "windows"
    command = ["ping", param, (str(count),
                host]
    try:
        output = subprocess.check_output
            (command, universal_newlines
                = True)
    print (output)
    except Exception as e:
        print (f"ping failed: {e}")
if __name__ == "__main__":
    ping ("8.8.8.8")
```

Output:

Ping 8.8.8.8 with 32 bytes of data:

Reply from 8.8.8.8: bytes: 32 time = 2ms TTL=119

Reply from 8.8.8.8: bytes = 32 time = 2ms TTL=119

Reply from 8.8.8.8: bytes = 32 times = 2 ms TTL=119

Reply from 8.8.8.8: bytes = 32 time = 2 ms TTL=119

Result:-

Thus the program to implement the own ping program was executed successfully.
